Sai Srikar Chirumarri

Mobile & Full-Stack Software Engineer

London, UK | +44 7553 859988 | saisrikar2512@gmail.com

LinkedIn | GitHub | Portfolio

Professional Summary

Mobile-focused engineer working in React Native, TypeScript, Go and PostgreSQL. Shipped METI Bills on iOS/Android and built offline and realtime fitness-app features at Arievo (external beta). Seeking mobile or full-stack roles in London.

Professional Experience

Founding Software Engineer Jul 2026 – Present
Arievo Limited London, UK | Remote

- As primary engineer, developed Arievo's React Native/Expo fitness app, implementing workout logging, partner matching and live group/social features in TypeScript.
- Built offline workout logging with a persistent operation queue and sequential replay, plus realtime data updates that recover after reconnection.
- Implemented Supabase authentication and PostgreSQL row-level security policies for workout data access.
- Developed server-enforced content moderation using Supabase Edge Functions and a Python service, checking approvals against the user and submitted content.
- Integrated push-notification workflows and distributed iOS/Android external beta builds through TestFlight and Google Play testing.

Product: Arievo website (external beta)

Software Developer (Contract) Feb 2026 – Jun 2026
METI Concept SRL London, UK | Remote

- Built and published the METI Bills iOS/Android app using React Native, Expo and TypeScript, including invoice and credit-note forms, VAT calculations and Go API integration.
- Fixed quarterly recurring-invoice schedules advancing after one month instead of three; added five model/integration tests for scheduling and database persistence.
- Enabled agricultural purchase-slip creation for self-billing across web and mobile, adding Go document transformations and database preferences.
- Fixed PDF exports failing on malformed embedded attachments with base64 cleanup and PDF regeneration fallback; added bounded retries for HTTP 429/5xx uploads.
- Diagnosed and fixed user-reported issues in the live METI Bills React website, tracing defects across Go APIs and PostgreSQL.
- Updated the existing METI Box Flutter app for API changes and maintained its Laravel website.

Built/published: METI Bills (App Store / Google Play) | **Updated:** METI Box

Technical Skills

Core stack: TypeScript, React Native, Expo, React, Go/Gin, PostgreSQL, Supabase
Other technologies: SQL, REST APIs, Supabase Edge Functions, Python, Flutter/Dart, PHP/Laravel
Engineering: Offline sync, realtime subscriptions, row-level security (RLS), Go unit/integration tests, Git, mobile releases
Additional: C++, C#, Unreal Engine

Education

MSc Computer Games Technology with VR — Distinction 2024 – 2025
City St George's, University of London | Global STEM Leadership Scholarship

BTech Computer Science and Engineering (Robotics specialisation) 2020 – 2024
Vellore Institute of Technology | CGPA: 8.4/10
